

Project report Template

CRM APPLICATION
THAT HELPS TO BOOK A
VISA SLOT

1.INTRODUCTION

Project Description

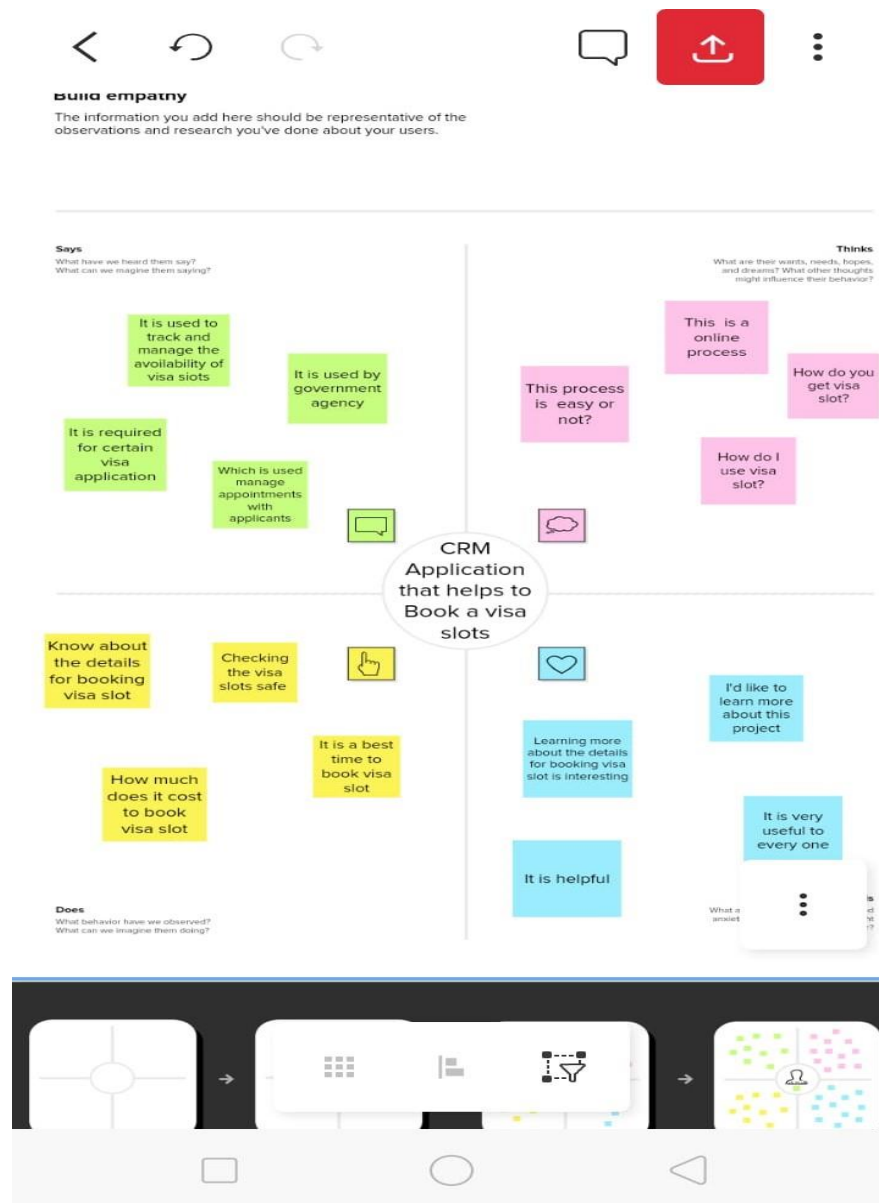

A visa slot management project is a system that is used to track and manage the availability of visa slots which are appointments that are required for certain visa applications. It might be used by a government agency or a visa processing center to schedule and manage appointments with applicants.

Purpose

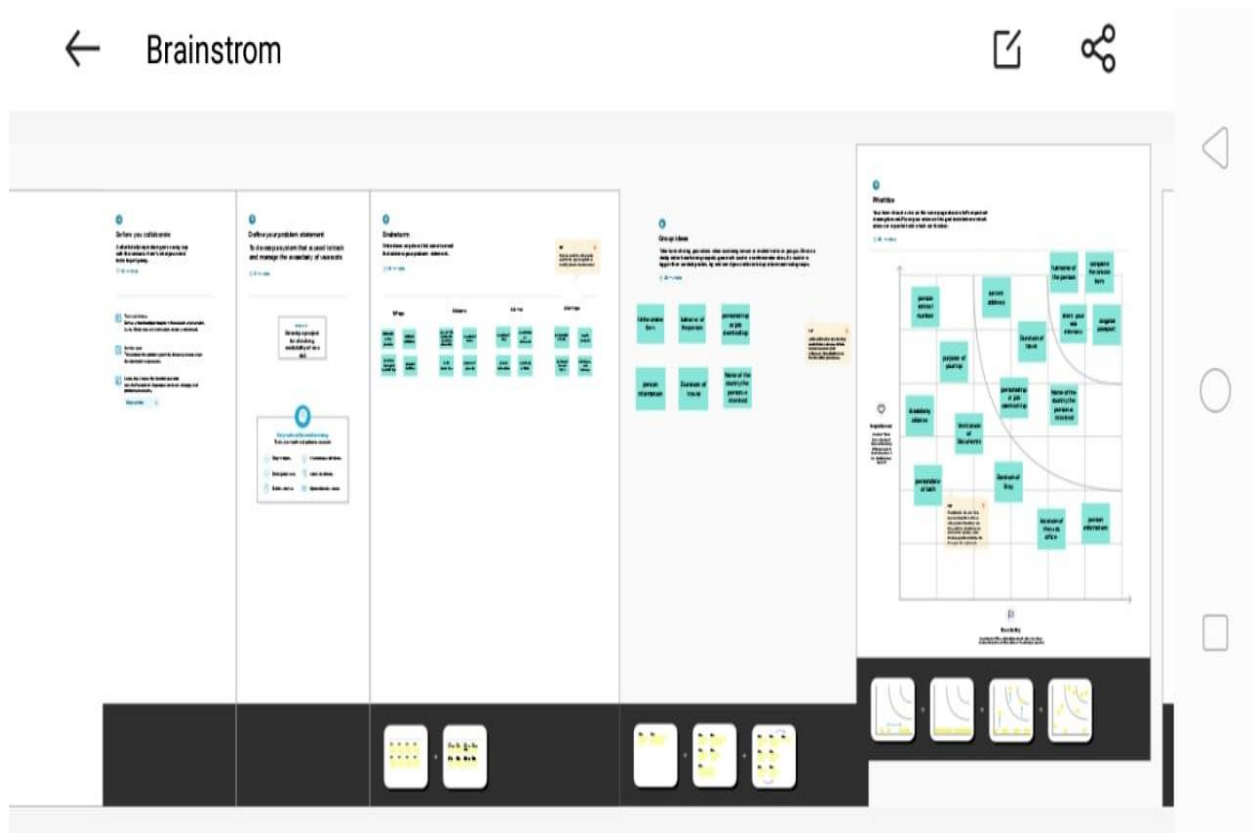

This will help you to track and manage the availability of visa slots. Which are appointments that are required for certain visa applications.

Problem Definition & Design Thinking

5.ADVANTAGES & DISADVANTAGE

Passport is a formal government issued ID	Main problem is there is no extension
It is very useful to every person	Shorter initial stay
You can have various options while choosing your tickets	Lobour condition application requirements

6.APPLICATION

Normal passport-The standard processing time is 30 to 45 days from the date of application.

Tatkal passport-The standard processing time is 1 working day without police verification.

Passport applications and related services can be submitted either online or offline.

The best option is to apply for a passport online, which is now practically entirely the process.

Different types of passports in india:

Diplomatic passport

Personal passport

Emigration passport

Official service passport

7.CONCLUSION

It might be used by a government agency or a visa processing center to schedule and manage appointments with applicants.

The passport is an essential document for the individual because it is the only acceptable form of identification.

8.Future scope

Passport automation system is an interface between the applicant and the authority responsible for the issue of passport .It aims at improving the efficiency in the issue of passport and reduces the complexities involved in it to the maximum possible extent.

THANK YOU
